DETAILED ACTION

1) Acknowledgement is made of Amendments received 10/7/2004 and 1/14/2005.

Applicants amend claims 3-9, 12, 14-16, 18-20, cancel claim 1, and offer new claims 21-35, for consideration. Claims 1-2, 10-11, 13, 17, are cancelled.

Claims 3-9, 12, 14-16, 18-35, are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2) Claims 3-9, 12, 14-16, 18-35, are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 10-19, of copending Application No. 10/181,405. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application and the co-pending application recite a device for treatment of glass melt that includes a pipe or a body made of metal such as copper, connected to a cooling

Art Unit: 1731

system, coated with a plastic material containing a halogen such as fluorine, the plastic coating having a decomposition temperature below the melting temperature of the glass melt, the thickness of the coating being 250 microns.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Response to Amendment

- 3) Amended Specification is accepted.
- 4) Claims 1, 3-9, 12, 14-16, 18-20, rejection under 35 U.S.C. 112, second paragraph, is withdrawn in view of cancelled and amended claims.
- 5) Claim 1 rejection under 35 U.S.C. 102(b) as being anticipated by Barnoach (5,011,562), is withdrawn in view of cancelled claim.

Conclusion

- 6) **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1731

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
